# Welcome to the [Customer Name] x You.com Workshop!

Use the [You.com](#) agent: [\[SaleEng\] Workshop Introduction Agent](#) to draft an introduction that is customer specific.

---

At You.com, our mission is to empower leading organizations like [Customer Name] to harness AI's potential for **innovation, efficiency, and customer-centricity**. Transparency is at the core of our platform: we deliver **credible, cited resources** that promote trust in AI responses.

Our secure, customizable AI solutions streamline research, automate response generation for specific tasks, and enhance decision-making by surfacing relevant and accurate insights. The You.com platform drives digital transformation and operational excellence at organizations like [Customer Name].

You.com offers unmatched flexibility and control, with **28+ large language models (LLMs) to choose from**, enabling users to optimize their approach for every task. For those who want quick, reliable answers, our **Auto Mode** intelligently selects the best model for the job, eliminating guesswork and saving time.

We provide robust out-of-the-box agents, such as **ARI for deep research**, which can analyze hundreds of resources and produce professional-quality reports. For organizations with unique needs, we also support **custom agent design**, allowing [Customer Name] to tailor AI solutions for specific use cases.

For a diversified [Customer Industry] like [Customer Name], You.com helps address key industry challenges—including **competitive analysis, regulatory compliance, and personalized customer experiences**—across [list of relevant areas in customer business].

## Workshop Schedule & Timeline

- **Workshop Kickoff Session Option(s):** Date(s)
- **Platform Access Begins:** Date
- **Trial Concludes:** Date

We'll start by introducing the You.com platform and clarifying the objectives of your upcoming trial. Participants will learn how to craft effective prompts, build and deploy AI agents, and explore practical ways to test You.com's efficiency and effectiveness in [Customer Name]'s core focus areas.

Platform access will be granted on [Date], giving you time to apply what you've learned before the trial concludes on [Date].

## Intended Outcomes

By the end of this workshop, you'll be equipped with practical skills to leverage You.com's AI capabilities in your daily work—whether that's accelerating [insert key areas of customer focus]. This will include insights into how AI can streamline [Customer Name]'s operations, improve collaboration across teams, and support your operational objectives. Most importantly, you'll leave ready to identify and implement high-impact use cases that create a competitive difference in today's rapidly evolving [Customer Industry] landscape—transforming how [Customer Name] approaches [key value areas].

---

## Evaluation Metrics

*These are examples. Please customize your POC metrics.*

- 1. User Adoption Rate:** At least 75% of provisioned users log into the platform at least once during the trial period.
- 2. Time Saved per Participant:** For each key workflow (e.g., email drafting, document summarization, research), measure baseline average completion time per task by [Customer Name] employees. After platform adoption, demonstrate a reduction of at least 15% in average completion time for each workflow through “time saved calculation.”
- 3. Relevancy and Accuracy of AI Outputs:** Randomly sample 3 AI outputs per user per week. Each output is rated for accuracy and relevancy (can be assessed by the user or via an AI self-audit), with an average score of at least 75% across all sample
- 4. User Satisfaction:** 70% response of “yes” to user-experience based survey questions
- 5. Platform Usage:** Average of at least 3 unique use cases tested per participant during the trial.

**6. Compliance with Data and Privacy Policies:** Platform demonstrates zero data retention and no use of customer data for model training settings, as verified by [Customer Name]'s IT/security team.

## **Participation & Feedback**

Surveys will be distributed at the midpoint and conclusion of the trial period. Each survey will include both quantitative questions and an open feedback section for users to share additional comments on benefits, challenges, or suggestions related to their experience with the You.com platform.

## Using You.com

- Platform access: [you.com](https://you.com)
- Training: <https://you.pairnow.ai/courses>
- Support and Knowledge Base: <https://you.com/support>

The provided training is tailored to guide you through **customized** scenarios that deepen your understanding of AI-powered tools and maximize your platform effectiveness. Whether you're new to AI or looking to advance your expertise, these resources will enhance both your You.com proficiency and your overall AI capabilities.

### Starting a New Chat

**Starting a new chat in You.com is a simple and intuitive process designed to help you interact with AI and get personalized responses quickly.** Here's how you can get started:

1. **Access the Platform:**

Go to [you.com](https://you.com) and sign in using your [Customer Name] email address.

2. **Initiate a New Chat:**

Once logged in, you'll see a chat interface where you can start a new conversation. Simply click into the chat input box—usually located at the bottom of the screen—and begin typing your question or prompt. You.com's AI will respond in real time, drawing on a wide range of sources to provide helpful, relevant answers.

## Enhance your productivity with AI

### 3. Personalize Your Experience:

For a more tailored interaction, you can adjust your chat preferences. Visit your profile settings (under your name in the bottom left hand corner), navigate to “User Preferences,” select “Chat,” and then choose “Configure Personalization.” This allows you to customize how the AI responds to your queries, ensuring the chat experience aligns with your needs.

### 4. Continue the Conversation:

You can keep the conversation going by entering follow-up questions or prompts in the same chat window. Each new message builds on the context of your previous interactions, making it easy to have a seamless, ongoing dialogue with the AI.

**Tip:** If you want to start a completely new topic, you can open a new chat window, ensuring your next conversation is fresh and focused.

## Adding attachments & URLs

When composing a prompt in You.com, look for the paperclip or “Attach” icon near the chat input box. Attaching a document to a chat thread allows you to share relevant files and reference specific information during your conversation. This makes it easier for both you and the AI to collaborate,

analyze, or answer questions based on the content within the attached document, streamlining your workflow and enhancing the quality of responses.

Click this icon to upload files such as PDFs, Word documents, or images. Once attached, you can reference the file in your prompt (e.g., “Summarize the attached PDF”). The AI will process your file and respond based on its contents.

To include a URL, you can include a web address directly into your prompt. For example, you can write: “Analyze the information on this page: [insert URL here].” The AI will use the linked content to inform its response. You also have the option of adding links from the upload interface.

**Tip:** You can combine both attachments and URLs in a single prompt, allowing for insights from multiple sources at once.

## Auto Mode and Model Selection

Click on the model selection menu to see a list of available LLMs. In the You.com platform, you can choose from 28+ LLMs including the latest models. Browse and select a model based on your

specific task—some models excel at creative writing, while others are optimized for technical accuracy, research, or summarization. Switching models is supported within the same chat thread as you enter new prompts. This gives you the flexibility to match the right model to each type of request.

Skip the model selection entirely with Auto Mode. You.com's intelligent routing analyzes your prompt and automatically pairs it with the best-performing LLM, delivering excellent results instantly. Ideal for fast-paced workflows or users who want quick answers or are new to working with AI models.

# [Customer Name] Suggested Prompts

To accelerate your onboarding, our team has curated prompts specifically designed for [Customer Name]'s key use cases. These examples showcase how You.com can streamline research, summarization, and content creation workflows. Consider them your starting point—we encourage you to adapt and create your own prompts as you explore the platform's capabilities.

## General Prompts (Warm up)

- Draft me an email [internal/external user case]
- Summarize this report, highlighting key topics and recommended next steps.
- Create a concise report [industry changes in vertical].
- Generate a list of common customer questions about [industry] and provide clear answers for each.
- Create an outline for a presentation on [insert topic]

## Specific Prompt Examples

Use the [You.com](#) agent: [\[SalesEng\] Workshop Prompt Generator Agent](#) to create 10-15 prompts to get this prospect started using the platform. These should be industry specific and take into account any use cases as outlined by the prospect.

- Prompt

**Why this is valuable:** Explanation

## Creating Agents in You.com

For organizations or individuals with unique requirements, You.com supports the creation of custom agents. This means users can design and deploy AI agents tailored to their specific workflows, data sources, or business objectives—enabling a personalized and scalable approach to AI-powered productivity.

You.com makes it easy for users and organizations to build custom agents tailored to their specific needs, workflows, and goals. With the platform's intuitive interface and built-in tools, you can quickly design, test, and deploy agents that automate tasks, provide tailored information, or enhance productivity. One particularly helpful tool available for this process is the **Agent Prompt Pro** agent, available as a platform default by you.com. This agent generates effective prompts specifically for custom agent creation.

## Using Agent Prompt Pro

OFFICIAL

### Agent Prompt Pro

Generate effective Custom Agent prompts

By You.com

**Agent Prompt Pro** is designed to help users craft high-quality prompts and instructions for their agents. By leveraging this agent, you can ensure that your custom agent's instructions are clear, comprehensive, and well-aligned with its intended use. Simply engage with Agent Prompt Pro, describe what you want your new agent to accomplish, and receive suggestions for effective prompts and structure.

## **Key Steps for Creating a Quality Agent**

When designing a custom agent in You.com, consider the following important steps and areas to address:

### **1. Define What the Agent Will Do**

Clearly identify the main function of your agent. Is it answering technical questions, summarizing documents, providing code samples, or something else? A precise description helps guide both the agent's behavior and user expectations.

### **2. Specify Areas of Focus**

Outline the topics or domains your agent should concentrate on. For example, you might want the agent to focus on financial analysis, customer support, competitive intel, or something else.

### **3. Assign a Role (*if applicable*)**

Sometimes giving your agent a "role" helps refine its output. For example, you might specify that the agent should act as a "friendly customer service agent," a "strict reviewer," or a "business analyst." This can guide the agent's tone and approach.

### **4. Provide Style Instructions for Outputs**

Detail any preferences for how the agent should present its answers. Do you want bullet points, formal language, or concise summaries? Style instructions ensure consistency and clarity in responses.

### **5. List Anything the Agent Should Avoid**

Highlight topics, types of content, or behaviors to avoid. For example, you may want the agent to steer clear of giving medical advice or avoid personal opinions.

### **6. Clarify the Overall Goal and Objectives**

Articulate the broader aim of the agent. Is it to save time, improve accuracy, support a specific business process, or enhance user engagement? Defining the objective helps prioritize features and responses.

An example of a good agent description might look like this:

***Agent Description: Internal Email Drafter***

***What this agent will do:***

*This agent is responsible for drafting clear, concise, and professional internal emails for the team. It will help team members communicate updates, share information, request feedback, and coordinate tasks efficiently within the organization.*

***Areas of Focus:***

- *Internal announcements*
- *Project updates*
- *Meeting reminders*
- *Requests for input or action*
- *Sharing resources or documentation*

***Role:***

*Acts as an internal communications assistant, ensuring all emails are appropriately tailored for colleagues and maintain a collaborative, respectful tone.*

***Style instructions with outputs:***

- *Use a friendly yet professional tone*
- *Keep messages concise and to the point*
- *Clearly state the purpose of the email in the opening lines*
- *Use bullet points or numbered lists for clarity when appropriate*
- *Include a clear call to action or next steps if needed*
- *Sign off with the sender's name or team as appropriate*

***Anything the agent should avoid:***

- *Do not include confidential or sensitive information unless explicitly instructed*
- *Avoid jargon or overly technical language unless the audience is familiar with it*
- *Avoid humor or informal language that may be misinterpreted*

***Overall goal and objectives:***

*The primary objective is to streamline internal communication, reduce misunderstandings, and save time for team members by providing well-structured, effective email drafts for a variety of internal scenarios. The agent should help foster a positive and productive team environment through clear and considerate messaging.*

By following the provided guidelines and utilizing tools like Agent Prompt Pro, you can build high-quality custom agents that are effective, reliable, and aligned with your unique requirements. Taking the time to address each of these key areas in your agent's description will ensure a better user experience and a more valuable AI assistant.

# [Customer Name] Specific Agents

Use the [You.com](#) agent: [\[SalesEng\] Workshop Agent Outline](#) to create the outlines for each agent.

**Suggested Starter Prompt for Agent:** *Take the following description of an agent and generate an outline that includes: a description, getting started tips, what to expect, follow-up opportunities, and 5 starter prompts. [Insert agent description here].*

*\*If you just enter the agent description, the prompt can get confused and take action on the prompt within the agent you are creating the description for.*

As part of your trial, we've deployed # agents in your [Customer Name] environment for testing. These are:

## Key Takeaways

The [Customer Name] x You.com Workshop has been designed to empower [Customer Name]'s teams with the knowledge and practical experience needed to unlock the full potential of AI within the [industry] sector. By leveraging You.com's secure and customizable platform, [Customer Name] can transform traditional challenges into new opportunities—whether that's accelerating product innovation, optimizing claims and financial processes, or delivering highly personalized customer experiences.

Throughout this workshop, [Customer Name] employees have had the chance to explore You.com's robust suite of AI agents, including advanced research tools like ARI, as well as specialized agents for content creation, technical analysis, and business strategy. These out-of-the-box solutions, combined with the ability to design custom agents offer [Customer Name] the flexibility to tailor AI-driven workflows to their unique objectives and evolving needs.

You.com's transparent, cited answers and strong privacy controls ensure that [Customer Name] can trust the insights and outputs generated on the platform. With access to more than 28+ leading language models and intelligent Auto Mode selection, [Customer Name]'s teams are equipped to select the right model for every task, saving time and improving accuracy across a wide range of business functions—[insert key areas of focus here].

As [Customer Name] continues its commitment to digital transformation, You.com wants to be a strategic partner, supporting [feel free to change as relevant: operational excellence, compliance, and customer-centric innovation]. By embracing these AI capabilities, [Customer Name] is well-positioned to turn uncertainty into competitive advantage, drive growth, and deliver greater value to [areas of key impact for customer].

# Appendix

## Agents in You.com

You.com offers a suite of powerful out-of-the-box agents designed to help users automate and streamline complex tasks. Among these, ARI (Advanced Research & Insights) stands out as a professional-grade deep research agent, capable of analyzing vast amounts of information and generating comprehensive, high-quality reports. ARI is particularly valuable for business users who need to synthesize data from multiple sources quickly and accurately, making it an ideal tool for deep research and insights generation.

In addition to ARI, You.com's platform includes several other ready-to-use agents that can assist with a variety of workflows, from summarizing documents to automating repetitive business processes. These agents are designed to work seamlessly within the platform, allowing users to boost productivity and focus on higher-value tasks. A full list of OOTB agents in the platform with their descriptions is as follows:

### Business and Strategy Agents

- **Porter's 5 Forces:** Evaluates competition, suppliers, buyers, new entrants, and substitutes using Porter's 5 Forces framework.
  - **Counterpoint Agent:** Challenges assumptions, identifies blind spots, and tests ideas for strategic thinking.
  - **Product Namer:** Brainstorms creative product names.
  - **Product Strategist:** Helps create a comprehensive product strategy.
  - **Strategic Report Generator:** Creates tailored reports, outlines, and content for strategic purposes.
- 

### Research and Analysis Agents

- **ARI:** Conducts 10x deeper web research for advanced insights.
- **Research:** Performs deep research with industry-leading accuracy.
- **10-K Reader:** Uploads and summarizes 10-K financial reports.

- **Research Paper Pro:** Uploads and summarizes research papers.
  - **Company Profiler:** Gathers key information about a company.
- 

## Content Creation Agents

- **Create:** Transforms ideas into polished images and visuals.
  - **SEO Content Crafter:** Optimizes content for specific keywords.
  - **Brand Voice:** Writes content aligned with your brand's tone and style.
  - **Ghostwriter:** Elevates your writing with creative suggestions.
  - **Presentation Slide Generator:** Creates tailored presentations with outlines, content, and visuals.
- 

## Programming and Technical Agents

- **Compute:** Solves complex data and engineering challenges.
  - **SQL Generator:** Converts natural language into SQL queries.
  - **SQL Optimizer:** Optimizes SQL queries for MSSQL and PostgreSQL.
  - **Python Functions:** Generates Python function code from natural language.
  - **Unit Test Creator:** Creates Python unit tests for functions and components.
- 

## Summarization and Communication Agents

- **Expert Interview Summarizer:** Summarizes expert interview transcripts, extracting actionable insights.
- **Meeting Summarizer:** Organizes and structures meeting notes.
- **Earnings Call Summarizer:** Summarizes earnings call transcripts or stock symbol data.
- **Sales Emailer:** Gathers and structures key information for sales emails.

---

## Finance and Investment Agents

- **Investment Memo:** Generates investment memos based on uploaded sources.
  - **Investment Assumptions Checker:** Validates financial assumptions against benchmarks.
  - **Investor Update:** Creates polished investor or LP reports.
  - **Procurement Helper:** Assists in comparing and selecting products.
- 

## Specialized Agents

- **Agent Prompt Pro:** Generates effective prompts for custom agents.
- **LLM Answer Comparer:** Analyzes and compares responses from large language models.

# You.com Mobile App

How to get started with the You.com Mobile App

## 1. Download and Install the App

- Visit the [App Store \(iOS\)](#) or [Google Play Store \(Android\)](#) and search for “You.com.”
- Tap **Install** and wait for the app to download to your device.

## 2. Sign Up or Log In

- Open the app and select **Sign Up** to create a new account (if you haven’t activated your account yet), or **Log In**.
- You can register using your organizational email address.
- Follow the on-screen prompts to verify your account if required.

## 3. Navigating the Main Interface

- Use the prompt area to enter questions, keywords, or prompts.
- You can change the response model or use an agent by tapping the bottom left of the prompt area.

#### 4. Using Agents

- Tap the **Custom** option within the response selection to choose from a list of available AI agents (under Agents header).
- Select an agent that matches your task (for example, ARI for research or Compute for calculations).
- Enter your prompt and the agent will respond or perform the task.

#### 5. Accessing Past Interactions

- Tap the **History** tab (bottom right) to review previous searches, chats, or documents.
- Easily revisit or continue conversations.

## 6. Getting Help

- Access the **Help** or **Support** section in the app menu for FAQs, troubleshooting, or to contact customer support.
- 

### Tips for Best Results:

- Be specific with your prompts to get the most accurate and helpful responses.
- Explore different agents to see which best fits your tasks and workflows.

# Common FAQs

## 1. What is You.com?

You.com is an AI-powered platform that helps users search, create, and generate responses to a variety of tasks. It includes access to 28+ LLMs including the most recent releases/versions and a wide range of specialized agents designed for productivity, research, and content generation.

## 2. What are AI agents on You.com?

AI agents are specialized assistants that perform specific tasks, such as research, summarization, coding, or report generation. Each agent is optimized to produce a specific output or address a certain need.

## 3. Can I create custom agents on You.com?

Yes! You.com supports the creation of custom agents tailored to your unique workflows, data sources, or business goals. The “Agent Prompt Pro” agent can help you design effective prompts for your custom agents.

## 4. How do I switch between different agents or response models?

You can switch agents or response models by selecting your desired choice from the “select AI” option in the bottom left of the prompt area. This is supported from within an existing chat if you want to switch the response mechanism but keep the conversation context.

## 5. Is You.com available on mobile devices?

Yes, You.com offers a mobile app for both iOS and Android, allowing you to access all platform features and agents on the go.

## 6. What types of files can I upload for analysis or summarization?

You.com agents support a variety of file types, including PDFs, DOCX, and TXT files, depending on the agent’s specific capabilities.

## **7. How is my data used and protected on You.com?**

You.com is committed to user privacy and data security. Uploaded data is processed securely and not shared with third parties. You can find more information in the platform's privacy policy.

## **8. Can I share results or outputs from agents?**

Yes, you can share a thread by sending a link to your chat. Export is also supported in doc, rtf, and, mfd format. ARI generated reports can also be downloaded in pdf format. Generated content can be copied directly by selecting and copying a desired portion of the output or by using the "copy text" option at the bottom of a response.

## **9. How do I get support if I have a problem or question?**

You can access the Help or Support section within the app or website for FAQs, troubleshooting, and direct contact with customer support.

## **10. How do I provide feedback or request new features?**

As part of this trial period, we will be issuing two surveys, one midway through the trial and one at the end. These surveys will include a comment area where feedback on what worked well and what may need improvement is optional but very welcome.
